

As a courtesy to our patients, we will submit insurance claims to your carrier to be paid directly to us. We will estimate benefit coverage according to eligibility and benefits offered by your plan. **We require payment of any portion not covered by insurance at the time service is performed.** This includes deductibles, co-pays and non-covered services. We try our hardest to maintain accurate and current benefit information. However, there are times when the insurance claim does not match what was expected. In this case, we will generate a statement for the difference after we receive your insurance reimbursement upon which prompt payment is expected and appreciated.

Currently we accept patients with benefits from all dental insurance carriers. **At this time we do not subscribe to any HMO's.** If you are covered by an HMO we are happy to see you, however; please check your policy information to determine level of coverage for going outside of your HMO assigned dentist before receiving treatment. We will be happy to assist you with this.

In addition to accepting most dental insurance, we are proud to be considered as **Preferred Dental Providers** for the plans specified below:
